

# Zafiro

H Link 102 mm

Zafiro is located in the 500,000-acre Block B, 68km (42 miles) WNW of Bioko Island, Equatorial Guinea, adjacent to the international border with Nigeria. Water depths range from less than 300ft to greater than 5000ft. Zafiro Blend production is loaded from Serpentina FPSO. Zafiro production was merged with Topacio production in 2Q 2005. This „new“ Zafiro Blend is jointly produced by Mobil Equatorial Guinea Inc., Ocean Equatorial

Guinea Corporation, and the government of Equatorial Guinea. This project is located central to the existing crude operations along West Africa's coast, offshore from Equatorial Guinea.

Tankers moor to a Tandem Mooring System where VLCC's can load as a first or second port cargo. Max loading rate is 47,200 bbls per hour via a floating hose string fitted with 2 X 16" flange connections.
