

# SOFEC Sepoc

Sepoc LTM Anchor Shackle 85 mm

## Location and Application

A Single Point Mooring (SPM) system is being supplied to Safer Exploration, Production and Operations Company (SEPOC) for crude oil export facility to replace the existing offshore Floating Storage and & offloading facility (FSO). The SPM is to be installed in the red sea, close to the coast of Ras Issa peninsula, Yemen at an approximate depth of 33.5 m (MSL).
